

## INVESTMENT OBJECTIVE AND STRATEGY

Quasar Emerging Markets Bond Fund is an actively managed long-only fund investing in global Emerging Markets Corporate and Sovereign High Yield Bonds, denominated in USD. We look for issuers and bonds through a disciplined investment process. Our multi- approach due diligence is composed of country macroeconomic outlook, geopolitical and sector overview, company and country credit metrics analysis as well as a local validation in the field of our investment thesis. The Fund has a highly diversified allocation among countries and companies. It invests in the best risk/reward ideas, searching for an absolute return strategy.

## Risk Information

Investments in debt securities are subject to interest rate, credit and default risk. The fund may invest in emerging markets that may be more volatile and generate higher operational risks than equity markets of well-established economies. The fund may invest in lower rated securities that are subject to higher credit risk and are more volatile than higher rated securities. The fund may invest in asset backed instruments that would lose their value if their underlying assets value was to diminish or if their issuer was to default and be unable to meet its contractual obligations. The fund may invest in securities that are less liquid because buyers/sellers are not always in sufficient numbers to trade these securities readily. Financial derivative instruments may be used as part of the investment process, which may increase the fund volatility and expose the fund to the risk of default of its counterparties. Currency forwards will be used to reduce the currency risk generated by investments in share-classes or instruments that are not denominated in the fund base currency. The effectiveness of that hedging process will be subject to counterparty and operational risk. Cash placed in time deposits or money market funds are exposed to their issuer default risk. This is an advertising document.
